GRIP-LOK®

Catheter and Line Securement

Safe, Simple, Secure
Grip-Lok is latex free and packaged sterile, allowing you to use Grip-Lok close to the insertion site or right in the sterile field.

Simple... Grip-Lok is applied in the same simple manner as a bandage and can be easily placed and adjusted with gloved hands.

Secure... Durably engineered, Grip-Lok holds better than tape and helps prevent dislodgement and migration, resulting in reduced risk of lost lines and patient discomfort. Using Grip-Lok for catheter stabilization conforms to the Infusion Nursing Standards of Practice\(^1\) and can eliminate the need for sutures and unscheduled catheter restarts, thus directly reducing needlestick injuries\(^2\).

Manufactured catheter stabilization devices are now listed as “preferred” in the Infusion Nursing Standards of Practice\(^1\). Grip-Lok is a stabilization and securement device that is strong enough to lock catheters, tubes and lines securely in place, yet versatile enough for almost any securement situation.

\(^1\)Infusion Nursing Standards of Practice, February 2006, Infusion Nurses Society
\(^2\)OSHA Fact Sheet: Securing Medical Catheters
Universal Peripheral IV and Arterial Catheter Securement

Grip-Lok 3300MIV secures the catheter and Luer hub from the top, bottom and sides. The unique wrap-around design provides securement that maintains optimal catheter insertion angle and provides protection for the skin from hard plastic parts.

Overall length: 3.5” (8.9cm)
Patent Pending

3300MIV will secure ported catheters.

3300MIV will secure needleless connectors.

By securing both the catheter and Luer connector, the 3300MIV maintains insertion angle.
Medium Wide Adhesive
Grip-Lok Medium Wide Adhesive will adhere and secure catheters made from silicone, PVC and other plastic compounds. The versatility of Grip-Lok Medium Wide Adhesive will secure larger tubes in addition to a wide variety of hub sizes and shapes.

Overall length: 3.5” (8.9cm)
Patent #: D608,887

Neonatal Securement

Nasal Gastric Hydrocolloid
Grip-Lok Nasal Gastric Hydrocolloid provides firm securement of feeding tubes including silicone materials and will fit tube sizes ranging from 1 to 2mm in diameter. With a very small footprint, the Nasal Gastric Hydrocolloid is designed to provide securement on the smallest of patients.

- Designed for tubes sized 1/25" - 5/64" (1.0 - 2.0mm) in diameter.
- Overall length: 1.65" (4.2cm)
- Patent #: D663,834.

Neonatal PICC and Line Securement
Grip-Lok Neonatal PICC stabilization device will fit a wide range of hubs made from silicone and other plastic compounds. Grip-Lok is applied in the same simple manner as a bandage and can be easily placed on skin with gloved hands. 2200NUZA has zinc oxide skin contact adhesive that is gentle on sensitive skin and neonatal patients.

- Designed for neonatal sized PICC lines.
- Overall length: 2.25" (5.7cm)

Foley Catheter
Grip-Lok Large Foley Catheter Securement is designed to hold the catheter in a channel created by a foam insert and a fabric loop over-strap. Grip-Lok for Foley Catheter does not utilize adhesive to secure the catheter in place allowing for freedom of movement and patient comfort. The degree of rotational and horizontal movement can be adjusted using the top fabric over-straps.
Designed for tubes sized 12 - 30 French in diameter.
Overall length: 6.25” (15.9cm)
Patent #: D616,983

Pediatric Foley Catheter
Grip-Lok Pediatric Foley Catheter Securement works just like the larger 3400LFC, but the reduced size may be preferred for pediatric and small adult patients.
Designed for tubes sized 12 - 30 French in diameter.
Overall length: 3.5” (8.9cm)
Patent Pending

Medium

Grip-Lok Medium universal stabilization device is versatile enough for almost any securement situation and is strong enough to securely hold lines and tubes 3 to 8mm in diameter.

Designed for tubes sized 1/8” - 5/16” (3.0 - 8.0mm) in diameter.
Overall length: 3.5” (8.9cm)

Applications:
- IV Lines
- Surgical Drains
- Catheter tubes
- Bedside Monitoring Equipment
- Any tube, line or catheter sized between 3 and 8mm in diameter that needs to be secured.

Grip-Lok Securement Devices

Large
Grip-Lok Large is a universal large line and catheter stabilization device that will hold tubes 6 to 13mm in diameter securely in place. Grip-Lok Large can provide firm securement for chest tubes and provides comfortable securement of wide range of latex Foley catheter sizes.

- Designed for tubes sized 1/4” - 1/2” (6.0 - 13.0mm) in diameter.
- Overall length: 6.25” (15.9cm)

Applications:
- Chest Tubes
- Foley Catheters
- Any tube, line or catheter sized between 6 and 13mm in diameter that needs to be secured.

Small
Grip-Lok Small universal stabilization device is strong enough to lock lines and tubes 1.5 to 4.5mm in diameter. Grip-Lok Small can be used in a wide variety of applications that require a smaller footprint area such as on infants or children.

- Designed for tubes sized 1/16” - 3/16” (1.5 - 4.5mm) in diameter.
- Overall length: 3” (7.6cm)

Applications:
- Feeding Tubes
- IV Lines
- Bedside Monitoring Equipment
- Any tube, line or catheter sized between 1.5 and 4.5mm in diameter that needs to be secured.

**Epidural Catheter Securement**

Grip-Lok Epidural is a catheter stabilization device that provides a foam insert specifically designed for securing and preventing kinking of epidural catheters. The low profile of the Medium Epidural Grip-Lok is designed for maximum patient comfort.

Designed for tubes sized 1/64" - 5/64" (0.5 - 2.0mm) in diameter.

Overall length: 3.5" (8.9cm)

Patent #: 8,251,957

**Universal CVC Securement**

Grip-Lok 3601CVC for PICC and CVC securement provides an adhesive area that will stick to a wide range of hubs and delivers superior protection from accidental line pulls.

Overall length: 3.5” (8.9cm)
Patent Pending

*The 3601CVC can secure on the chest or neck and is designed to provide stable suture-free securement at the catheter attachment points.*
Arrow® CVC
Grip-Lok for Arrow CVC will secure subclavian access at the hub and will also fit alternative catheter attachment points.

Designed for Arrow-Hoses CVC hubs. Arrow is a trademark of Teleflex Incorporated.

Overall length: 3.5" (8.9cm)
Patent #: 8,500,698
